

## Internship Opportunities at Porosil

**About Us:** Porosil is a leading startup in the field of green chemistry, dedicated to creating sustainable and effective chemical solutions. We're currently based at TU Berlin and supported by EXIST FT.

### Internships Available:

- 1. Pilot Scale Testing Intern**
  - **What You'll Do:** Help set up and run pilot-scale trials, analyze data, and improve efficiency and safety.
  - **What You'll Learn:** Real-world skills in pilot plant operations and data analysis.
- 2. Synthesis Intern**
  - **What You'll Do:** Perform chemical experiments, test new materials, and work on making processes scalable.
  - **What You'll Learn:** Practical experience in synthetic chemistry and material testing.
- 3. Business Development Intern**
  - **What You'll Do:** Analyze market trends, engage with potential clients, and help shape our business strategy.
  - **What You'll Learn:** Business insights in a tech startup environment, including market research and strategic planning.

### Why Join Us?

- **Innovative Environment:** Join a dynamic team where innovation and creativity are at the heart of everything we do.
- **Make an Impact:** Help develop technologies that improve sustainability and environmental health.
- **Career Growth:** Build valuable skills in the fast-growing field of green chemistry.

**Who Can Apply?** We welcome eager, curious, and motivated individuals. If you're a student or recent grad in chemistry, chemical engineering, industrial engineering, business, or similar, get in touch! We're especially set up to supervise **TU Berlin students for industrial internships**.

**How to Apply:** Email your resume and a short cover letter to [rhea.machado@tu-berlin.de](mailto:rhea.machado@tu-berlin.de). Tell us why you're a great match and specify which internship you're interested in.
